TECHNOLOGY CAPABILITIES ALIGNMENT PROJECT

- Councils & Government aware of globalization impact on SME's.
- South East region is the home of Australian manufacturing.
- 40% Victoria's "output economy" is from this area.
- It makes good economic sense to provide practical support to SME's
- The area is well served with PFRO's
- However, technological capabilities not readily known by SME's

TECHNOLOGY CAPABILITIES ALIGNMENT PROJECT

Contract 2006122

- Aims to identify opportunities for manufacturers
- Capitalize on know-how and technology from the PFRO's
- To gain technology transfer and market advantage for the SME's
- Increasing export and economic growth for the region
- Cetec will project manage the interface to enable this to occur

TECHNOLOGY CAPABILITIES ALIGNMENT PROJECT

Open Meeting #2

- This is the second of 5 Open Meetings to advise local Industry of the advantages of joining the program
- Cetec will provide a free confidential consultation to SME's to explore their ongoing and future technological needs.
- These specific needs will be matched with the capabilities of the research partners
- Intention is to establish collaborative technological ventures between the SME's and the PFRO's.
